

Firestop Systems

LAN-TEL for Your Firestop System Needs:

When fire strikes, injuries are likely to occur first and more often from smoke and toxic gases than from the fire itself. Because of this, it is crucial that your firestop systems be engineered, installed and maintained according to the Life Safety and building codes. LAN-TEL, together with its partners, has the solutions and the expertise in place to ensure that the appropriate firestop system is installed and maintained on your premises.

LAN-TEL Take Your Project from Start to Finish:

LAN-TEL collaborates with its partners and implements its unique six-step process to ensure that your firestop systems are flawlessly engineered, installed and maintained. Together our partners, we provide the design, the expert project management required to oversee the installation, and the post-installation documentation that is critical for the ongoing maintenance and upkeep of your systems.

LAN-TEL for a Full Suite of Integrated Solutions:

LAN-TEL is positioned to provide the latest code-compliant firestop solutions for all scenarios on your premises.

LAN-TEL for Best-of Breed Equipment and Application Providers:

LAN-TEL offers firestop systems from the leading providers in the industry today.
